

Pregis 360 Virtual Reality Training

WHAT IS PREGIS VR?

An industry leading tool utilizing virtual reality to expedite and standardize packer training. The program focuses on how to properly operate and pack using Pregis solutions; condensing hours of traditional training to minutes in virtual.

WHO IS IT GOOD FOR?

Any company which experiences high turnover, has seasonal work force fluctuation or utilizes staffing agencies for fulfillment labor.

WHY WAS THIS TECHNOLOGY DEVELOPED?

As employee tenure is reduced, the costs to efficiently and effectively train replacements becomes more challenging. Additionally, VR technology fully engages the employee, resulting in more retention for a longer period of time compared to traditional training methods. The goal is to expedite training, redeploy personnel and avoid costly damages.
